SUMMARY

Senior Flutter Developer with 5+ years building and shipping cross-platform iOS and Android apps from a single codebase. Strong in Dart, Clean Architecture and BLoC state management, RESTful API integration with async data handling, and multi-tenant / white-label build infrastructure. Experienced in automated testing (TDD), performance optimization, and CI/CD release pipelines (GitHub Actions, GitLab CI, Fastlane). Published pub.dev plugin author and team mentor.

CORE SKILLS

Languages & Framework: Dart, Flutter, basic Kotlin/Java (Android), JavaScript

Architecture & State: Clean Architecture, BLoC, dependency injection (get_it), white-label / multi-tenant (flavor-based) builds, reusable component libraries

APIs & Backend: RESTful API integration, async data handling, data caching, deep linking, Firebase, basic Node.js

Quality & Delivery: Unit / widget / integration (end-to-end) testing, TDD, performance optimization, debugging & production issue resolution

DevOps & Tooling: CI/CD, GitHub Actions, GitLab CI, Fastlane, Flutter flavors, App Store & Google Play deployment, Git, Android Studio, VS Code

Process & Design: Agile / Scrum, code review, mentoring, Jira, Trello, Figma, Adobe XD

Spoken Languages: English (Fluent), German (B2), Arabic (Native)

PROFESSIONAL EXPERIENCE

Software Engineer — Core Systems Technology

Cairo, Egypt | Feb 2025 – Present

- Owned mobile delivery standards end-to-end (Clean Architecture, BLoC, flavor-based config), standardizing the iOS/Android release flow via GitHub Actions and Fastlane and cutting new-feature ramp time 30%.
- Mentored junior Flutter developers through structured code reviews and pair programming, raising team productivity 30%.
- Implemented automated unit, widget, and integration testing plus performance monitoring, reducing post-release defects 25% and improving app reliability 15%.
- Drove architecture and code-review refinements, lifting code-quality metrics 20% and reducing cross-release regressions.

Software Engineer (Contract) — Core Systems Technology

Cairo, Egypt | Feb 2024 – Feb 2025

- Implemented deep linking across Flutter apps, increasing user engagement 15% and app sessions 20% within 3 months.
- Re-architected projects on Clean Architecture, reducing new-feature dev time 30% and maintenance cost 20%.
- Integrated dependency injection (BLoC + get_it), cutting defects 25% and accelerating delivery 40%.
- Built multi-tenant Flutter build infrastructure using flavor-based configuration, enabling reliable per-client (white-label) builds and cutting deployment errors 40%.

Software Developer (Contract) — Wide Technology

Riyadh, Saudi Arabia | Nov 2021 – Feb 2025

- Shipped cross-platform Flutter apps to the iOS App Store and Google Play, converting UI/UX designs into pixel-perfect interfaces and raising user retention 20%.
- Integrated RESTful APIs with async data handling and local caching, cutting screen load times 50%.
- Resolved 50+ production bugs through systematic debugging and root-cause analysis, reducing support tickets 40% and lowering development cost 20%.

Flutter Developer (Contract) — Projectech

New Cairo, Egypt | Sep 2021 – Aug 2022

- Delivered Flutter apps across e-commerce, social, and utility domains, driving 30% client revenue growth.
- Ran agile sprints with iterative releases and client feedback loops, improving delivery efficiency 50%.

Android Developer Intern — Projectech

New Cairo, Egypt | Aug 2020 – Nov 2020

- Reduced Android app crashes 20% by adding test coverage and crash monitoring; contributed to data-driven UI improvements that raised conversion.

PROJECTS & PUBLICATIONS

- telephony_sms** — Open-source Flutter plugin (published on pub.dev) that sends SMS messages in the background. pub.dev/packages/telephony_sms
- Genetic Algorithm Golden Ratio Design Model** — Springer publication. doi.org/10.1007/978-3-031-07512-4_8

EDUCATION

B.Sc. Computer Science — MSA University (Egypt) with University of Greenwich (UK) | 2017 – 2021
